

How do I find out what products (Herbicides, Insecticides, and fungicides) are approved for use in organic crop production?

Go to <http://www.ams.usda.gov/nop> and click on 'National List of Allowed and Prohibited Substances' under the 'I want information on' tab. Then click on 'The National List in the Final Rule (PDF).' The sections specific to crop production are §§ 205.601 and 205.602.
